

Manufacturer of peanut butter spreads satisfaction with Gold Seal GS-90 conveyor-mounted label applicator to cotton candy line.

The Packaging Challenge:

In 2011, a manufacturer of peanut butter was looking for a reliable, efficient apply-only applicator that could be installed on an existing packaging line conveyor. The applicator had to tamp-blow a label on a curved surface on the front of a plastic jar, and another label on a recessed area on the 3-1/2" circular jar lid.

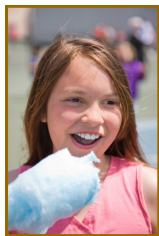

The Packaging Solution:

In 2011, the company discovered Fortis Solutions Group on the internet. After meeting with our specialists, they chose to purchase two Gold Seal GS-90T conveyor-mounted applicators.

The Packaging Results:

Our satisfied customer appreciates the simple Gold Seal design which features stepper motor drives and no belts, no chains, no wear parts, no oil, and no greasing. The applicators have performed flawlessly for over a year, eight hours a day, five days a week, with no adjustments or maintenance, at a rate of 30 jars/minute.

They are now in the process of obtaining two more Gold Seals for a separate cotton candy packaging line. So, before you purchase your next applicator, explore the proven Gold Seal line from Fortis Solutions Group. **Based on the real -life experiences of our customers, the Gold Seal is a much "butter" buy for your buck!**

Please contact us today to explore the possibilities.
