

## SMALL ROLL LABELS

# SUPPORT FOR VARIABLE MOBILE PRINTING

### SMALL ROLL LABELS FOR ON DEMAND PRINTING

Mobile label printing offers unparalleled convenience and flexibility, allowing users to produce high-quality labels no matter the location. Mobile printing streamlines operations and improves productivity when utilized for shipping and receiving, picking, sorting and work-in-process. The applications of mobile printers and labels are diverse and impactful across the supply chain.

As the requirement to print labels on demand, when and where they are needed continues to grow, the utilization of small roll labels and mobile printing has increased exponentially. Mobile printing systems offer the quality and convenience necessary to provide documentation for both internal and customer-facing operations.

The key to the expanding use of mobile printing is the ability to provide labels on small rolls, with outside diameters of only 1 to 5 inches. Fortis has invested in the specialized equipment to run small roll production for mobile printing labels. Our turret rewinders speed up the finishing process, accelerating production and lowering your cost of labels.

With our proven capabilities in providing thermal transfer and direct thermal labels, our industry-leading print and finishing capabilities, and nationwide locations, Fortis is an exceptional packaging partner when looking for mobile printing and label support.

We excel at developing solutions for your complicated packaging applications; whatever your challenges are, we can support you.

### WHY CHOOSE FORTIS?

Focus on quick turn, small roll label production.

Invested in specialized equipment to support high-volume, small roll requirements.

Years of experience with all brands of mobile printers to provide unparalleled support.

Locations across North America with small roll capability.
